

# Evolution of Scissors

Kai Vogel

IED B2

# Type of scissors

- Scissors have two main design, spring scissors and cross blade scissors

spring scissors

cross blade scissors

# Invention of scissors

- First scissors were invented in 1500 BC in Egypt. They were made with one piece of metal, it is called the spring scissors.
- Most of people do not use this kind of scissors any more.

# Spring scissors

# Cross blade scissors

- Scissors Robert Hinchliffe invented.

- In 100 AD, first cross blade scissors were invented in Rome.
- They were made with silver, bronze, or iron.
- Scissors were not common in use until 17<sup>th</sup> century
- In 1761 Robert Hinchliffe from London invented the first steel scissors.

# Plastic handled scissors

- In 1967 Fiskars introduced the first plastic handled scissors.
- This allowed more spread of cross brade scissors in to the world, and made the main design of scissors we are using now.
